

IMC calculator policy

From 1st June 2020 IMC candidates will not be permitted to use a handheld calculator during their examination. The onscreen calculator will be available for all questions during the exam.

It is the responsibility of candidates to familiarise themselves with the functioning of the onscreen calculator.

Pearson VUE staff cannot give support to candidates on the use of the onscreen calculator during the examination.

All candidates will be provided with an onscreen scratch pad for your workings. Candidates should use the online demo test to familiarise themselves with the onscreen calculator and scratch pad, which can be found [here](#).

A user guide for the onscreen calculator can be found [here](#)

Please note: the scratch pad demonstrated in this online demo is not used for CFA UK. Candidates who sit their test at a Pearson Vue test centre will be provided with a physical wipe board. Candidates who sit their exam via OnVUE online proctoring will have the use of an onscreen whiteboard. Details of the onscreen whiteboard can be found [here](#).
